

Frog Facts for Kids

There are over 4,700 species of frogs in the world.

Frogs absorb water through their skin, which means they don't need to drink!

Frogs can lay as many as 4,000 eggs in frogspawn.

The eyes and nose of a frog are on top of its head so it can breathe and see when most of its body is under the water.

Some frogs can jump up to 20 times their own body length in a single leap.

Herpetologists study frogs and toads. Herpetology is the study of amphibians and reptiles.

Amphibians don't see color — they only see in black or white.
